

Prof. Manuel Ángel Fernández Rodríguez. *Scientific Director.* Ph.D. in Organic Chemistry from the Universidad de Oviedo, with extensive research experience at different universities and research centers in Spain and USA, primarily in Organometallic Chemistry, Catalysis and Organic Synthesis. Throughout his research career, he has been involved in more than 40 research projects and contracts (16 of them as a PI), and has published over 65 scientific articles in JCR-indexed journals, 4 book chapters and 8 patents (1 of them international). It is worth noting that almost 85% of his publications are in Q1 quartile journals, with an h index of 30. Additionally, he has presented over 80 contributions at national and international conferences.

Furthermore, he has supervised 7 Doctoral Theses and 16 Master's Theses, currently overseeing 4 more Doctoral Theses. As a full professor in the Department of Organic and Inorganic Chemistry at the Universidad de Alcalá, his research focuses on the development of new catalytic and synthetic processes and their application in the field of new materials and medical chemistry
